Mr. Howland Wood,
Curator American Numismatic Society,
Broadway at 156th Street,
New York City.

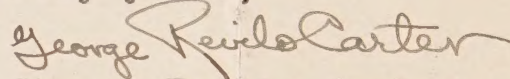

Dear Sir:-

May I trouble you to send me one sample of each type of envelope which you have for filing away coins and medals.

I am very much interested in obtaining correct information regarding 1) a non-tarnish paper for such envelopes, 2) the names and addresses of firms who manufacture envelopes for numismatic purposes and 3) any other information which you have to enable the filing of copper and silver coins without tarnishing.

I assume that the American Numismatic Society has already considered and probably solved this proposition. If such is not the case, it may be possible for me to study this subject in some detail.

Very sincerely yours,

George Revilo Carter.

Dear Sir:

I have your letter of December 3rd. We use no envelopes in filing our coins and medals. Everything we have is kept in show boxes and placed in show trays. I know, however, that a number of coin dealers have advertised a non-tarnish paper, and advertisements have appeared in The Numismatist. Also, a number of dealers supply various shaped ^{envelopes} ~~boxes~~ for coins; some of these in use today are square - some come black and others printed.

I will admit that it is extremely hard to keep coins from tarnishing, and we are considerably bothered with it, but we have to keep our coins where they can be easily seen and worked over. Many people keep them in small celluloid envelopes, which allows the coin to be seen without being touched, but they are rather expensive if one has many specimens.

I am enclosing a list of dealers which will perhaps be of service to you.

Very truly yours,

Curator

Dear Sir:

Since my last reply to you in reference to your letter of September 15th, will say that I have been unable to locate any Japanese coin dealers. I have written to two or three people but unfortunately no one knows of any reliable dealers nor any who understand English.

Regretting I am unable to furnish you the information you desire, I am,
